# DAN-BOARD PRODUCTS

DAN-Board Ground protection mats are stable plastic plates made of regranulate from 100% recycled plastic and has many possible applications. The product is used in many industries as road plates or bottom plates and in agricultural products. GP mats can withstand high loads and at the same time are resistant to liquids and chemicals, ensuring a long service life and lasting product.

In this document you will find **pictures showcasing** day to day use of our **Ground protection mats**.
